

Chibi

THE TOUGH ONE

Chibi is designed to go wherever you go, easily and safely, in the trunk of your car. Handlebars fold at the twist of a knob, fuel system seals closed.

When you own a Chibi, you'll want to raise a little dust. Chibi's oversized air cleaner is designed to keep it out of the engine. Element is replaceable.

Out-accelerates, out-climbs, out-performs everything in its class. Reason? The Bridgestone 60cc 2-stroke engine with 3-speed transmission. But there is more: folding handlebars and positive fuel system shut off for easy car trunk transporting; internal expanding brakes both front and rear; big roomy saddle; raised and shielded muffler. CHIBI — big fun, big performance in a mini package.

SPECIFICATIONS

Engine Type: 2-cycle rotary valve
 Cylinder: Single
 Bore x Stroke: 1.65 x 1.65 inches
 Horsepower: 5.8 @ 8500 rpm
 Ignition: Magneto
 Transmission: 3-speed, constant mesh
 Clutch: Multi-plate, wet
 Frame: Welded tubular steel
 Suspension: Telescopic fork; swing arm & shocks, rear
 Brakes: Internal expanding, front & rear
 Fuel Capacity: 1.2 Gal.

Ground Clearance: 5.75 in.
 Dry Weight: 120 lb.
 Tires: 3:50 x 8 knobby

STANDARD EQUIPMENT

Internal expanding brakes — front and rear
 Telescopic front fork
 Heavy duty rear shock absorbers
 Oversized padded saddle
 Folding foot pegs
 Fuel system shut off
 3:50x8 knobby tires
 Replaceable element air cleaner
 Scrambler-type, shielded muffler
 Chain guard
 Tool kit
 Kickstand
 Folding handlebars

by rockford

Headlight and taillight are standard equipment on the new Chibi. Handlebars fold for easy transporting in auto trunk.

New Chibi styling is highlighted by cleanly flowing tank lines. Saddle base encloses roomy storage compartment.

New lighting system, all new styling, traditional Bridgestone performance – that's CHIBI. Chibi's acceleration and climbing ability have to be experienced to be believed. The 5.8 hp engine and 3-speed transmission can get you places ordinary mini-bikes can't. The folding handlebars and fuel shut-off system make transporting a breeze, too. Test ride a Chibi and get ready to change your mind about what a mini-cycle should be.

SPECIFICATIONS

Engine Type:	2-cycle rotary valve single
Bore x Stroke:	1.65 x 1.65 in.
Horsepower:	5.8 @ 8500 rpm
Ignition:	Magneto
